Procurement & Cost Comparison — Sample

Finance operations portfolio • fictional demonstration data

Public-sharing note: This is an anonymised, edited portfolio sample. Any figures, organisations, targets and examples are illustrative unless explicitly identified as general methodology. It is not a client deliverable or an official company policy.

Purpose

This sample demonstrates how a procurement workbook can structure supplier quotations and compare unit cost, quantity and extended value. All suppliers, products, prices, order references and quantities below are fictional demonstration data.

Item	Category	Qty	Illustrative unit cost	Extended value
AC charger — sample A	EV charging equipment	4	£80.00	£320.00
AC charger — sample B	EV charging equipment	6	£95.00	£570.00
Type 2 cable — sample	Accessory	10	£18.00	£180.00
RFID card — sample	Accessory	100	£0.40	£40.00
			Total	**£1,110.00**

Controls demonstrated

- Separate supplier quote details from approval and payment records.
- Check arithmetic, quantities, currency and tax assumptions before approval.
- Record quote date, reviewer and approval status in the working file.
- Store bank details and supplier contact information in restricted systems, not in a public portfolio.

No real supplier, customer, bank account, invoice number, tax identifier, address or commercial pricing is included in this version.
